

Twins PRO Series

500W / 700W / 900W

Introduction

Twins series, a redundant power supply, is designed for standard ATX or PS2 chassis, no front end bracket needed, ideal for mail, web or home server. Hot swappable modules design provides stable power supply: when one fails, the other can take over the load immediately. Thus users do not need to worry about any server/PC power off situation.

Features

Hot Swappable Modules

No worry about power off

FSP Guardian

User Interface Software
Monitoring real status immediately

Ribbon Cable

Space-saving installation

DC to DC Module Design

Providing high efficient, stable power

- ATX PS2 redundant size, no front end bracket needed, ideal for mail, web and home server
- Digital-controlled power supply design can be monitored by "FSP Guardian" software
- Hot swappable modules design and no worry about server/PC power off when one of modules failure
- Complete protection: over current protection, short circuit protection, over voltage protection, fan failure protection
- Alarm guard design by smart power supply status LED indicator
- Complies with ATX 12V and EPS 12V standards
- Compliance with IEC 62368
- Flat ribbon cables, ideal solution for applications with space constraint issue

Twins PRO Series

500W / 700W / 900W

Product Overview

Built-in hot swappable modules

When a component fails and the redundant unit takes over, the bad one can be replaced without stopping the operation.

Stable power supply provider

Different from PC power supply, during normal operation, the two modules share the load for optimum efficiency; while one fails, the other will immediately take over the whole load to guarantee the system under a stable power supply situation.

Power Cord Lock device

Ideal for home, mail or web server system

Twins series is an ATX PS2 size redundant. Without front end bracket, it is an ideal power supply for a home cloud server system or small and medium-sized enterprises' (SMEs') web server or mail server system.

User Interface

FSP Guardian Software

Desktop monitoring and control software

Connect the USB of Twins PRO 500W, 700W and 900W to a motherboard USB header, you can use FSP Guardian software to monitor power input, power output, efficiency, and other internal records in real time or get historical data within 30 days. When power input or output reaches the warning points during the process, FSP Guardian will immediately shows warning information message to remind users the latest situation of Twins PRO 500W, 700W and 900W.

Twins PRO Series

500W / 700W / 900W

Rating

500W Frame Model No.: FSP500-50RAB

AC Input	100-240V~ 8-4A 60-50Hz				
DC Output	+3.3V	+5V	+12V1	-12V	+5Vsb
Max Output Current	20A	20A	41.76A	0.5A	3A
Max Combined Power	130W				
Total Power	500W				

Single Module Model No.: FSP520-20RAB

AC Input	100-240V~ 8-4A 60-50Hz				
DC Output	+12V ⋮ 43.3A		+5Vsb ⋮ 3.0A		
Total Power	520W				

700W Frame Model No.: FSP700-50RAB

AC Input	100-240V~ 10-5A 60-50Hz				
DC Output	+3.3V	+5V	+12V1	-12V	+5Vsb
Max Output Current	20A	20A	58.3A	0.5A	3A
Max Combined Power	130W				
Total Power	700W				

Single Module Model No.: FSP720-20RAB

AC Input	100-240V~ 10-5A 60-50Hz				
DC Output	+12V ⋮ 60A		+5Vsb ⋮ 3.0A		
Total Power	720W				

900W Frame Model No.: FSP900-50REB

AC Input	100-240V~ 10-6A 60-50Hz				
DC Output	+3.3V	+5V	+12V1	-12V	+5Vsb
Max Output Current	20A	20A	75A	0.5A	3A
Max Combined Power	130W				
Total Power	900W				

Single Module Model No.: FSP930-20REB

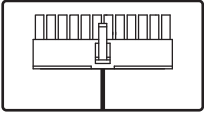

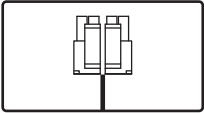

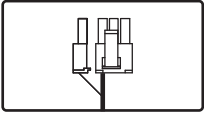

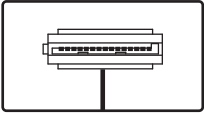

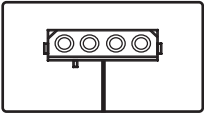

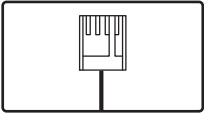

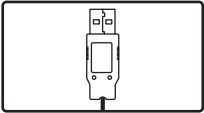

AC Input	100-240V~ 10-6A 60-50Hz				
DC Output	+12V ⋮ 77.5A		+5Vsb ⋮ 3.0A		
Total Power	930W
