

DAGGER PRO Series

550W / 650W / 750W / 850W

Introduction

The FSP DAGGER PRO features with standard SFX size and included ATX adapter bracket to help users easily install an SFX power supply into an ATX, Micro-ATX or Mini-ITX chassis. With this compact size but comes with powerful output, especially the +12V single-rail offers VGA cards full power individually and to avoid any overloading conditions. Besides, the fully modular and all black cable design save your system an optimal airflow space and easy to make a cable management for a polished look.

DAGGER PRO series lineup 2 new wattage now, there are 4 different power output options to choose from 550W, 650W, 750W and 850W.

Features

Semi-fanless Design

To spin over 20% loading that makes optimal cooling and reduces noise.

+12V Single Rail Design

Designed for power-intensive VGA cards, provides strong power to any overloading condition.

DC – DC Module

Providing high efficient , stable power.

SFX to ATX Adapter Bracket

Helps users easily install an SFX power supply into an ATX, Micro-ATX or Mini-ITX chassis.

- Compliance with newest SFX12V V3.3
- Efficiency $\geq 90\%$ at typical load
- MIA IC™ (Multiple Intelligence Ability) chip set inside
- Semi-fanless design for silent operation
- Quiet and long-lasting 92mm ball bearing fan
- Ribbon cables for the need of enthusiasts
- Powerful single +12V rail design
- Japanese electrolytic capacitors
- Intel Latest CPU ready
- Full protections OCP, OVP, SCP, OPP, OTP

Product Overview

MIA IC™ Chip Set with DC-DC Module

An integrated power solution of FSP's own patented IC design with DC-DC module ensures solid power delivery to your system.

Single +12V rail

Multi.+12V rail

Powerful +12V Single Rail

VGA card is a component which needs greedy and stable power supporting most. The compact size DAGGER PRO series comes with a single +12V rail design that offers VGA cards full power individually and to avoid any overloading conditions.

Japanese Capacitors

Japanese electrolytic capacitors endure over 100 °C degree temperature, it ensures safety on spare parts for prolong lifespan and reliability.

Semi-fanless Design with 92mm Fan

An advanced semi-fanless design will spin over 20% loading that makes optimal cooling and reduces noise under maximum operation.

DAGGER PRO Series

550W / 650W / 750W / 850W

Product Overview

SFX to ATX Adapter Bracket

It helps you easily install an SFX power supply into an ATX, Micro-ATX or Mini-ITX chassis.

For 650W / 750W / 850W

Perfectly Supports Z390 Motherboard | RTX2080 VGA

The DAGGER PRO features with 2 sets of CPU 4+4 and PCI-E connectors to support high-end motherboard or RTX2080 VGA with supremely stable power.

2013 ErP/EuP Ready

The total AC power consumption of the completed system is less than 0.3W in standby mode.

Full Modular Design with Ribbon Cable

Neat build and easy installation enhance cooling performance.

Product Overview

*Shown DAGGER PRO 850W

Innovative cooling layout

What is the distraction of developing high wattage SFX PSU? It's the heat.

First of all, DAGGER PRO series uses **Japanese electrolytic capacitors** to build the foundation for high temperature resistance, and **uses innovative PCB board circuit design** for transformers and inductance components that are most prone to high temperatures to form natural heat dissipation air ducts from the inside out to eliminate waste heat. Improve the endurance of the power supply and break through the limitations of small size, high waste heat, and small wattage, so that the SFX size power supply can reach 850W / 750W power output.

Tiny but powerful

It conforms to the standard small form factor size (125 x 100 x 63.5mm) and provides the highest 850W power output in the industry, demonstrating FSP's high power density R&D technology capabilities.
