

Product Description

Designed for photography enthusiasts and videographers, Transcend's Premium SDHC Class 10 Ultra High Speed memory cards are ideal for enhancing the performance of mid-level DSLR and high-end point-and-shoot. You can now capture, store, and transfer photos faster and more reliably than ever before.

High Speed Premium UHS-I Card

Combining the already impressive Class 10 specification with the performance boost of UHS-I, Transcend's Premium Class 10 SDHC Ultra High Speed memory cards can help your camera unleash its full potential. With an impressive transfer rate of up to 300x (45MB/s) and a wide range of capacities, this card is an ideal complement to any mid-level DSLR or high-end point-and-shoot cameras.

Full HD, 3D, & 4K Video Recording Capabilities

To capture every moment in brilliant color and stunning detail, Transcend's Premium SDHC Class 10 UHS-I cards are optimized to meet the rigorous demands of high-resolution image capture and smooth Full HD 1080p, 3D and even next-generation 4K video recording.

Improved Camera Response

Transcend's Premium UHS-I cards enhance the performance of your DSLR by improving your camera's response time during continuous burst mode shooting. What's more, with plenty of space to store countless images, these cards eliminate the need to pause and switch memory cards during extended photo shoots.

Never drop a frame when you upgrade to the next generation premium SDHC UHS-I Card.

Excellent Compatibility & Post-Production Efficiency

The versatile Premium SDHC Class 10 UHS-I cards offer excellent multi-platform compatibility for SDHC devices. When paired with a high-end card reader such as Transcend's USB 3.0 [RDF8](#), [RDF5](#) or ExpressCard [RDF1](#), users can obtain maximum transfer rate.

RecoverRx™ Software

With a purchase of Transcend SDXC Class 10 UHS-I cards, you can download our exclusive RecoverRx software for free. This user-friendly application allows you to conduct an in-depth search within your storage device for traces of erased files to be recovered.

Built-In Error Correction Code (ECC)

The memory cards are equipped with built-in ECC, which automatically detects and corrects potential transfer errors. Paired with a write-protection switch, you'll never have to worry about any data loss.

Storage Chart

	Digital Photos			Video Recording
				
	8 Megapixels JPEG¹	12 Megapixels JPEG²	RAW³	Full HD⁴
8GB	1920 photos	1280 photos	548 photos	120 minutes
16GB	3840 photos	2560 photos	1096 photos	240 minutes
32GB	7680 photos	5120 photos	2192 photos	480 minutes

¹ Based on file size 4MB. ² Based on file size 6MB. ³ Based on total size 14MB.

⁴ Full HD Video based on 1920x1080 9Mbps H.264 AVC compression.

Storage capacity approximations are for general reference only. Actual results will vary depending on resolution, compression quality, video frame rate/interlace settings, and content. 1GB = 1 billion bytes. A certain portion of the storage capacity may be reserved for firmware and maintenance use.

* Note: speed may vary depending on the device and usage of hardware or software.

* SDHC UHS-I cards are backwards compatible with SDHC class 10 devices.

* Available in Frustration-Free Packaging and/or regular retail package.

Please see Transcend website for additional warranty details and limitations.
