VersaMount™ makes your TrekPod™ an even more versatile tool. VersaMount enables:

- Picture taking from a seated or kneeling position
- Macro photography on TrekPod & many tripods
- Seated long-range observation with powerful spotting scopes

VersaMount can quickly be secured anywhere along a TrekPod's upper or lower tubes and be used to mount a MagMount™ or ShotRest™ mount for use with Mag Adapter-mounted devices.

Like TrekPod and TrekPod II™, VersaMount has an industry standard 1/4"-20 threaded stud, so almost any photographic or optical accessory can be attached.

VersaMount works on virtually any tube with a diameter between 14.25mm and 29.5mm, which equates to 0.56 inches (9/16") and 1.16 inches (just over 1-1/8"). Manufactured from high-strength aluminum alloy, VersaMount is extremely strong, yet weighs less than 3 ounces and fits in your pocket when not in use.

SPECIFICATIONS:

Limited Lifetime Warranty. For complete warranty details visit trek-tech.com, call us at 503.450.0030, or ask your retailer for details.

VersaMount Weight	2.9 oz/82.2gr
