

iTwin

The USB Drive Reinvented

Een personal cloud, veilig en eenvoudig

Simple

- Plug'n'Play into any USB Port
- Drag 'n' Drop any or all of your files
- No setup, no configurations
- Instantly connect two computers anywhere around the globe

Secure

TwinTrust™ technology platform

- Hardware-token based security
- Two-Factor Authentication
- State-of-the-Art Crypto via random AES 256-bit smart key
- Proprietary remote disable function

Unlimited

- Access, edit, download and upload all of your files from any PC or Mac®
- No extra charges or monthly fees
- Capacity up to the size of your hard drive(s)

iTwin Multi

Collaborate

Share the same work files with your entire team. Each team member can remotely view, edit and upload files to the shared folder so that everyone has access to up-to-date information.

Personalized File Sharing

Instead of sharing one big folder with everyone, share different files meant for different people. Share music with your friends and images with your family simultaneously

File Permissions

Choose between two levels of file permissions when sharing files with each contact. Ensure integrity of data and direction of information flow using File Properties feature.

NEW

Personal Cloud Storage

Zonder de iTwin is het veilig (met encryptie) overzetten van data lastig en tijdrovend. Met de iTwin is dit snel en eenvoudig. De iTwin is perfect voor mensen die niet beperkt willen worden in de opslag behoefte, zich zorgen maken over de veiligheid van cloud services of een standaard USB drive.
